One of the most picturesque remains of the glories of New France, whose sistory and legends date back to the age of Frontenac and La Salle, is the eld stone fort at Chambly, in the province of Quebec. The tablet on the ruins, with its motto, "Courage and Loyalty," in French, bears this inscription: "In the reign of Louis XIV. of France and Navarre, the Marquise de Vandreull being governor of New Vandreuil being governor of New France, this fort was erected in 1711, burned in 1776, restored by Guy Carle-ton in 1777, abandoned in 1847. It was repaired in 1882 in the reign of Victoria, queen of Great Britain, the Marquis of Lorne being governor general of Canada," etc. A fact which the in-scription kindly fails to record is that the burning referred to was by the American troops, who, having captured the fort in 1775 under General Montgomery, burned it the following year when they retreated to Lake Cham-plain. The various restorations have been made skillfully to harmonize with the weather beaten portions which resisted the fire of 1776.

Why is it that a policeman of medi-um build can handle frequently two and sometimes three men his size in a fight? An officer on the local force was discussing the question. "I'll tell you why it is," he said. "It is simply because the policeman is in uniform. The uniform denotes authority, and that takes the nerve out of his opponents to a certain extent. They know that they are breaking the law by resisting him, while he might even kill them and not commit a crime. All through a fight with a policeman the other fellow or fellows are thinking of escape. The officer isn't. He's thinking of subduing and arresting the man or men. He puts his whole effort and strength into it, while his opponents generally fight in a half hearted way. Put a policeman in citizen's clothes, with his star under his coat, and he wouldn't be able to whip two men his size any more than you would unless the two men knew he was an officer of the law."-Kansas City Times.

The courtship of the Saltis pulex, a spider, is described by an expert in insect life as a most elaborate exhibi-tion of skill and grace in dancing. Balancing his body on his long legs, he moves in a semicircle for about two inches and then, reversing the position, twists and turns in the opposite direction, repeating this grotesque figure scores of times and pausing every few minutes to rock from side to side and to bend his brilliant legs so that they may be brought into full view of his admiring mate. A similar display, but with varied antics, marks the lovemak ing of other sorts of spiders, but this manner of courting is not without its risks, and it may often happen that the lively suitor, if he prolongs his per-formance or shows off his points of perfection too persistently, is suddenly seized and devoured by his more mus-

of Ague and Malaria, can be relieved and cured with Electric Bitters. This is a pure, tonic medicine; of especial benefit in malaria, for it exerts a true curative influence on the disease, driving it entirely out of the system. It is much to be preferred to Quinine, having none of this drug's bad after-effects, E. S. Munday, of Henrietta, Tex., writes. "My brother was very low with malarial fever and jaundice, till he took Electric Bitters, which saved his life. At E. S. Leadbeater & Sons drug store; price 50c, guaranteed.

Very often a few cents properly invested, like buying seeds for his garden, will save several dollars outlay later on. It is the same in buying Chamberlain's Colic, Cholera and Diarrhoea Remedy. It costs but a few cents, and a bottle of it in the house often saves a doctor's bill of sev-eral dollars. For sale by Gibson & Tim-berman and W. F. Creighton & Co.
